### **Why would I want massage therapy for my dog?**

There are so many reasons, here are a few...

- Increasing circulation to every part of your pets body
- Strengthening the body by stimulating muscles
- Maintaining and restoring lost flexibility
- Increased blood flow helps to alleviate pain
- Comforts tired muscles
- Support in times of trauma, injury, surgery and grieving
- Stimulating or sedating the nervous system
- Increase fluid circulation of the urinary system

Once your dog has had a massage, we guarantee he/she will beg for another!!

Massage therapy can help with Arthritis, bursitis, elbow and hip dysplasia, rheumatism, grieving, loss of appetite, muscle atrophy, maintains muscle tone. It can also help reduce the stress of competitions or relax your pet after a long workout. Massage helps to keep your beloved family pet, a healthy happy part of your family.

See your vet for an initial diagnosis.
